

## **MARBLE TABLE TOP CARE INSTRUCTIONS**

Summer Classics natural stone tabletops have been engineered to withstand extremes of both temperature and precipitation. Our patented composite core and our detail to the application of penetrating sealers can assure you that you've purchased the finest quality marble top available anywhere!

Basic care of your Summer Classics table is a recommended resealing of your top annually. Commercial penetrating sealers, available at home improvement stores are sufficient. Stone enhancers are also available that can seal the top as well as enhance the stone colors. Both products are easy to use, and take only minutes to apply. Use a soft cloth with a mild liquid dish soap and water solution for routine cleaning.

Our tabletops are manufactured and sealed to resist stains. The nature of natural and grouts, is that they are very porous materials. Spills should be wiped promptly. Certain items such as red wine and citrus juices can affect the natural stones themselves if left for prolonged periods.

Care should be taken in the handling of your tabletop. Although the core is virtually indestructible, the natural stones may be damaged if the tabletop is dropped or rolled on hard surfaces.
